

U.S. – China Environmental Policy Forum
July 6, 2007
1:30 – 6:00 p.m.
Shangri-La Hotel
Qiangdao, China

As policymakers and business leaders around the world develop methods for combating climate change, the IT and electronics industry has taken a leadership role by establishing responsible e-waste and recycling policies. With globalization strongly influencing the development of varied regulations, however, manufacturers must be made aware of how laws differ around the world. Coordination among industry and government on environmental regulations and restrictions is key for the IT and electronics industry to successfully deliver the finest products to consumers.

CEA, together with AeA, ITI and USITO, is pleased to sponsor the U.S. – China Environmental Policy Forum on July 6th in Qingdao, China in conjunction with SINOCES. This event provides a unique opportunity for U.S. and Chinese government and high-tech industry leaders to discuss and manage the extremely important environmental regulation and compliance process together.

Topics for discussion include: Green Government Procurement and China's Accession to the World Trade Organization (WTO) Government Procurement Agreement (GPA); Restrictions on Hazardous Substances (RoHS); E-Waste and Recycling Best Practices; Design for Recycling and Industry Stewardship.

Panelists Include the Vice Minister from the People's Republic of China Ministry of Information Industry (MII) and a representative from the Ministry of Finance (MOF) ; Mr. Huang Jianzhong, drafter of the Chinese Administrative Measures for the Control of Pollution Caused by Electronic Information Products (China RoHS); representatives from the U.S. Environmental Protection Agency and the U.S. Department of Commerce; and Industry Leaders from the IT and Electronics industry.
